

Planning

I would have concerns about the regarding development on the Donaghaguy Road, Warrenpoint. This is a rural road which is heavily used by pedestrians. It has become an unofficial bypass because of congestion in Warrenpoint town centre. it also has 3 dangerous crossroads on it and has been prone to flooding.

Similarly the upper dromore roaf has seen a hude increase in traffic most of this has to go through the town centre increasing congestion also Burren is being used as bypass for congestion in Newry for traffic going in the direction of Belfast.

regards
