Section J | Which part(s) of the draft Plan Strategy are you commenting on?

Please give full details of why you consider the draft Plan Strategy to be unsound having regard to the test(s) you have identified above. Please be as clear and concise as possible.

HS1 is influenced by data provided in Technical Supplement 2 however the data is confusing in that it appears to include estimated figures including potential from unzoned land which has a significant degree of uncertainty. There is no consideration given to uncommitted zoned land which has no possibility of being developed within the foreseeable future and certain towns such as Newcastle and Warrenpoint are under specific pressure to have additional lands considered at this stage.

As HS1 is considered in conjunction with HS2 and HS3 the current approach is unsound.

Section 4.1.2 (P120) and section 4.1.3 (P121) looks at Social Aspects which are related to Policies HOU5 and HOU6. Unfortunately it would appear that there could be conflict between these policies and strategic social aims.

The proposal that EVERY site should have a minimum of 20% social or affordable allows for a site to be developed with 100% social, however this will not allow for the variety or social mix which is one of the aims of the plan.

The character of an area is also a material consideration. HOU5 if adopted with the 20% minimum could change the character of areas particularly where the plots are all large detached dwellings.

If you consider the draft Plan Strategy to be unsound, please provide details of what change(s) you consider necessary to make the draft Plan Strategy sound.

The housing strategy needs to be reviewed to take into account current zoned land which locally is known to have no prospect of being developed at present. If this is not the case certain areas will come under pressure to achieve target housing and there is no current mechanism apparent to include additional lands to meet the shortfall.

Policies HOU5 and HOU6 need reviewed to ensure that an appropriate housing mix can be achieved. The requirement for social and affordable should be site specific where there is a known demand and should not be applied to all sites.
