

Good Morning

I would like to make the following points about the above plan

1

The plan at over 400 pages was far too long.

2 community engagement seemed to be via meetings in the town hall in Warrenpoint or Beery after the plan was written. I could see no evidence of locals being able to contribute before it was written.

3

Although long on words, a lot of the report was very repetitive

4

It mentioned 7 times promoting WHA as a major port, this would seem to be at odds with promoting Tourism

5

Waste management

It talks about ensuring that waste is dealt with near at hand yet we have ReGen bringing waste from all over the world Ireland and 16 councils in England

6 it talks about ensuring that all new development ensures no adverse impact on the community with noise, pollution via sound smell dust whilst NEVER acknowledging that there is a major problem in Warrenpoint and now In Newry with pollution of stink from rotting bales in Warrenpoint harbour and now in Carnbane and all the council do is talk but no action. I as a resident have no faith in this report.

7 it says supporting tourism but there is no detail or substance In how that would be achieved

8 its time the people who vote in the council the people who pay the rates had a really bad say in the future of where we live.

I would like a response to this email and an acknowledgment it has been received.

I did not complete the downloadable form as it was much too complicated for an ordinary member of the community to complete, is there a reason for this.

Best wishes
