Update 25.03.20 Suspension of Birth Registration Service

Due to the latest government restrictions on non-essential travel, we are suspending our birth registration service for the next three weeks with immediate effect from Wednesday 25 March 2020. The situation will be reviewed after that period.

The General Register Office (GRO) has been in contact with the Department of Health to agree a process to ensure that parents can continue to register their child with their GP without the HS123 registration form.

For parents registering their child at a GP practice during the suspension of the birth registration process, the following information is required:

1. The child’s Health and Care number
2. The name of the child to be registered
3. The home address where the child will be residing.

For any further queries, please email registration@nmandd.org or telephone 0330 137 4041.
